Behind the mask, Appel notes, the student is free to create a personality; paradoxically, because the mask hides the self, it enables the student to probe more deeply into himself.

"This book describes, defines, and discusses the mask characterization process, providing the theory behind the exercises and the step-by-step procedure in the organic development of the character from the masks," Appel notes. The manual is divided into two parts: "The Instructor's Guide" and "The Actor's Guide." There is also an introductory chapter, "The Class Structure," which explains mask characterization procedures in the classroom, and a sample class schedule may be found in the back of the manual. This book adds a new dimension to

The critically acclaimed, award-winning, modern classic *Speak* is now a stunning graphic novel. "Speak up for yourself—we want to know what you have to say." From the first moment of her freshman year at Merryweather High, Melinda knows this is a big fat lie, part of the nonsense of high school. She is friendless—an outcast—because she busted an end-of-summer party by calling the cops, so now nobody will talk to her, let alone listen to her. Through her work on an art project, she is finally able to face what really happened that night: She was raped by an upperclassman, a guy who still attends Merryweather and is still a threat to her. With powerful illustrations by Emily Carroll, Laurie Halse Anderson's *Speak: The Graphic Novel* comes alive for new audiences and fans of the classic novel. This title has Common Core connections.

Featuring hundreds of original, color photographs, this fascinating study of New Guinea chronicles the rituals and daily life of this remote and culturally rich region. *Between the Tides* offers a compelling mix of New Guinean storytelling, history, natural history, politics, and culture. David Pickell brings warmth and intelligence to his subject, and Kal Muller's photographs are surprising and evocative. Together, author and photographer show how an isolated, nomadic past meets a worldly, urban future, history confronts superstition, and a false and imposed sense of shame yields to a new, and still fragile, pride. Their journey took them

What they found was a culture facing the delicate, sometimes humorous, occasionally painful, and always interesting process of change.

Most of what is known about the outside world remains superficial and stereotypical. *World and Its Peoples: Eastern and Southern Asia* brings a long, rich story to light about ethnic groups, the impact of terrain and natural resources, and the influence of history. This unique reference work maps out how the nations of the modern world became what they are today through photographs of the geography and people of foreign lands, through discussion of ancient and contemporary works of art and events, and through scores of maps detailing geographical features, historic and modern places, natural habitats, rainfall, locations of ethnic and linguistic groups, natural resources, and centers of industry and transportation. No single resource assembles such comprehensive insight into the world and the people who live in it.

The simple fabric face mask is a key agent in the fight against the global spread of COVID-19. However, beyond its role as a protective covering against coronavirus infection, the face mask is the bearer of powerful symbolic and political power and arouses intense emotions. Adopting an international perspective informed by social theory, *The Face Mask in COVID Times: A Sociomaterial Analysis* offers an intriguing and original investigation of the social, cultural and historical dimensions of face-masking as a practice in the age of COVID. Rather than Beck's 'risk society', we are now living in a 'COVID society', the long-term effects of which have yet to be experienced or imagined. Everything has changed. The COVID crisis has generated novel forms of sociality and new ways of living and moving through space and time. In this new world, the face mask has become a significant object, positioned as one of the key ways people can protect themselves and others from infection with the coronavirus. The face mask is rich with symbolic meaning as well as practical value. In the words of theorist Jane Bennett, the face mask has acquired a new 'thing-power' as it is coming together with human bodies in these times of uncertainty, illness and death. The role of the face mask in COVID times has been the subject of debate and dissension, arousing strong feelings. The historical and cultural contexts in which face masks against COVID contagion are worn (or not worn) are important to consider. In some countries, such as Japan and other East Asian nations, face mask wearing has a long tradition. Full or partial facial coverings, such as veiling, is common practice in regions such as the Middle East. In many other countries, including most countries in the Global North, most people, beyond health care workers, have little or no experience of face

masks. They have had to learn how to make sense of face masking as a protective practice and how to incorporate face masks into their everyday practices and routines. Face masking practices have become highly political. The USA has witnessed protests against face mask wearing that rest on 'sovereign individualism', a notion which is highly specific to the contemporary political climate in that country. Face masks have also been worn to make political statements: bearing anti-racist statements, for example, but also Trump campaign support. Meanwhile, celebrities and influencers have sought to advocate for face mask wearing as part of their branding, while art makers, museums, designers and novelty fashion manufacturers have identified the opportunity to profit from this sudden new market. Face masks have become a fashion item as well as a medical device: both a way of signifying the wearer's individuality and beliefs and their ethical stance in relation to the need to protect their own and others' health. *The Face Mask in COVID Times: A Sociomaterial Analysis* provides a short and accessible analysis of the sociomaterial dimensions of the face mask in the age of COVID-19. The book presents seven short chapters and an epilogue. We bring together sociomaterial theoretical perspectives with compelling examples from public health advice and campaigns, anti-mask activism as well as popular culture (news reports, blog posts, videos, online shopping sites, art works) to illustrate our theoretical points, and use Images to support our analysis.
