In its fifth Canadian edition, *Interplay: The Process of Interpersonal Communication* offers an immersive approach to the study of communication that foregrounds usefulness, readability, and student engagement. With up-to-date scholarship, case studies, and real-world examples, *Interplay* emphasizes the shifting dimensions of interaction made possible by social media and changing communication norms. *Interplay* is attentive to the ways in which communication practices shape and are shaped by culture, gender, and context; with extensive pedagogy integrated into its chapters, the book encourages readers to apply its insights to their own lives and relationships both within and beyond the classroom.

Grounded in theoretical principle, *Media Effects and Society* help students make the connection between mass media and the impact it has on society as a whole. The text also explores how the relationship individuals have with media is created, therefore helping them alleviate its harmful effects and enhance the positive ones. The range of media effects addressed herein includes news diffusion, learning from the mass media, socialization of children and adolescents, influences on public opinion and voting, and violent and sexually explicit media content. The text examines relevant research done in these areas and discusses it in a thorough and accessible manner. It also presents a variety of theoretical approaches to understanding media effects, including psychological and content-based theories. In addition, it demonstrates how theories can guide future research into the effects of newer mass communication technologies. The second edition includes a new chapter on effects of

entertainment, as well as text boxes with examples for each chapter, discussion of new technology effects integrated throughout the chapters, expanded pedagogy, and updates to the theory and research in the text.
