Legitimizing Television: Media Convergence and Cultural Status explores how and why television is gaining a new level of cultural respectability in the 21st century. Once looked down upon as a "plug-in drug" offering little redeeming social or artistic value, television is now said to be in a creative renaissance, with critics hailing the rise of Quality series such as *Mad Men* and *30 Rock*. Likewise, DVDs and DVRs, web video, HDTV, and mobile devices have shifted the longstanding conception of television as a household appliance toward a new understanding of TV as a sophisticated, high-tech gadget. Newman and Levine argue that television's growing prestige emerges alongside the convergence of media at technological, industrial, and experiential levels. Television is permitted to rise in respectability once it is connected to more highly valued media and audiences. Legitimation works by denigrating "ordinary" television associated with the past, distancing the television of the present from the feminized and mass audiences assumed to be inherent to the "old" TV. It is no coincidence that the most validated programming and technologies of the convergence era are associated with a more privileged viewership. The legitimization of television articulates the medium with the masculine over the feminine, the elite over the mass, reinforcing cultural hierarchies that have long perpetuated inequalities of gender and class. Legitimizing Television urges readers to move beyond the question of taste—whether TV is "good" or "bad"—and to focus instead on the cultural, political, and economic issues at stake in television's transformation in the digital age.

Every year, millions of people throw away countless items because they don't know how to fix them. Some products are manufactured in a way that makes it hard, if not impossible, for people to repair them themselves. This throwaway lifestyle depletes Earth's resources and adds to overflowing landfills. Now there's a better way. Repair Revolution chronicles the rise of Repair Cafes, Fixit Clinics, and other volunteer-run organizations devoted to helping consumers repair their beloved but broken items for free. Repair Revolution explores the philosophy and wisdom of repairing, as well as the Right to Repair movement. It provides inspiration and instructions for starting, staffing, and sustaining your own repair events. "Fixperts" share their favorite online repair resources, as well as tips and step-by-step instructions for how to make your own repairs. Ultimately, Repair Revolution is about more than fixing material objects: in an age of over-consumption and planned obsolescence, do-it-yourself repair is a way of caring for our lives, our communities, and our planet.

Practical TV and Video Systems Repair is a comprehensive text for second year electronics students on the theoretical design and practical service techniques for video electronics such as TVs, VCRs, satellite TV receivers and other video devices. The entire text uses an input-process-output model to discuss the details of electronic circuitry. This approach creates a higher level of understanding by consistently linking theory, application and troubleshooting. As such, the text, as well as each individual chapter, moves from basic theories to practical applications to troubleshooting techniques. Providing students with a complete and consistent approach to learning, each chapter outlines objectives, discusses theory and practice, and arranges learning checks in the form of review questions, service calls, test equipment primers and end-of-chapter summaries.
