The recent mass shooting on October 1, 2017 in Las Vegas, Nevada has been marked in history as the worst mass shooting in the United States to this point. The details of the shooting beg the question, is it coincidence that it happened in Nevada, a state with some of the least restrictive gun control laws? Mass shootings have become an unfortunate part of reality in the United States, but these are fairly uncommon occurrences. While they are horrific and deserve attention, daily gun violence cannot be forgotten. In the face of such a multitude of gun violence, what can be done to prevent future violence from occurring? This paper compares Nevada and California, two states that are geographically similar, but could not be more different when it comes to gun control. The paper draws connections between state gun control laws and gun violence trends in an attempt to determine what the best course of action is for addressing the problem.

situation, it needs to be brought to bear by the defender within a second or two of a threat materializing. In a chaotic and violent self-defense situation, time and space are commodities that the self-defender does not enjoy.

Présentation de l'éditeur : "Nearly half of all privately owned firearms in the world are in American hands. The U.S. homicide rate is 6 times higher than the average of all developed countries, and more than three times higher than any individual country. Half of all homicides are committed with a firearm. Gun advocates claim that the high rate of private gun ownership does not contribute to this; some even argue that murder rates would be lower if only more people carried guns to defend themselves. Pro gun control advocates find the correlation between number of guns and gun violence an obvious one - and that it should be the starting point for discussion about gun control. Both sides think their cases are strong, and have created a political stalemate. Can the truth of these views be evaluated rationally and dispassionately? Hugh LaFollette argues the gun control debate is more complex than advocates on either side acknowledge. It requires resolving moral and legal questions about the nature of and limitations on rights, as well as the responsibility of government to protect citizens from risk. It requires assessing claims about the right to bear arms, as well as the right to be secure from harm caused by guns. Empirical findings must be considered-about the role of guns in causing harm, the degree to which private ownership of guns can protect innocent civilians from attacks by criminals, whether the government should be

constrained by a well-armed citizenry, and the degree to which laws seriously limiting access to guns can be effectively enforced. Lafollette carefully sorts through all these conceptual, moral, and empirical claims. He concludes that all things considered, the U.S. does need more gun control than we have. He then proposes an indirect strategy for decreasing harm from firearms-requiring all gun owners to have liability insurance (something the NRA actually encourages) similar to that of car owners. Lafollette argues that this approach could reduce gun violence without the problem of government intrusion. Painstakingly fair and historically informed, the book is mainly designed for use in applied ethics and public policy courses, showcasing how one might approach a difficult topic with care and even-handedness in order to construct a rational argument. In Defense of Gun Control sorts through the conceptual, moral, and empirical claims to fairly assess arguments for and against serious gun control." this book debunks the lethal logic behind the myths that have framed the gun control debate (Ariana Huffington, co-founder of HuffingtonPost) The gun lobby's remarkable success in using engaging slogans to frame the gun control debate has allowed it to block lifesaving gun legislation for decades. But is there any truth to this bumper-sticker logic? Dennis Henigan exposes the mythology and misguided thinking at the core of these pro-gun catchphrases, which continue to have an outsized influence on public attitudes toward guns and gun control. He counters the gun lobby's messages by weaving together the most compelling current research and insights drawn from the grim reality of deadly gunfire in our homes and communities. Henigan charts a new path toward ending the American nightmare of gun violence. Pro-Gun Myths Include: "When guns are outlawed, only outlaws will have guns." "An armed society is a polite society." "The only thing that stops a bad guy with a gun is a good guy with a gun." "Gun control doesn't work because criminals don't follow the law." "Gun manufacturers shouldn't be responsible for gun crime, any more than Budweiser is responsible for drunk driving." "We don't need new gun laws. We just need to enforce the ones we have." "Gun control is a slippery slope to complete gun bans."

anticipated books of 2019 by Esquire and the Boston Globe In the era of Donald Trump, many lower- and middle-class white Americans are drawn to politicians who pledge to make their lives great again. But as *Dying of Whiteness* shows, the policies that result actually place white Americans at ever-greater risk of sickness and death. Physician Jonathan M. Metzl's quest to understand the health implications of "backlash governance" leads him across America's heartland. Interviewing a range of everyday Americans, he examines how racial resentment has fueled progun laws in Missouri, resistance to the Affordable Care Act in Tennessee, and cuts to schools and social services in Kansas. And he shows these policies' costs: increasing deaths by gun suicide, falling life expectancies, and rising dropout rates. White Americans, Metzl argues, must reject the racial hierarchies that promise to aid them but in fact lead our nation to demise.

"Dr. Miguel Faria's journey into politics and the public health and gun control movements began when, as editor of the *Journal of the Medical Association of Georgia*, he studied the problem of gun violence and discovered the gun research conducted by the medical establishment was not scientific research as claimed, but politicized, result-oriented propaganda designed to bolster the preordained conclusion that guns should be eradicated from the general

population. Faria and three other experts testified before a congressional subcommittee, exposing the pseudoscience of the gun research conducted by the Center for Disease Control (CDC) and proposing the elimination of funds for such research. Congress agreed and passed the Dickey Amendment, restricting CDC gun research that advocates for gun control. Faria relates his adventures during his stint "within the belly" of the public health establishment that is, his appointment by President George W. Bush as a member of a grant review committee at the National Center for Injury Prevention and Control (NCIPC) of the CDC, the very institution he had criticized for nearly a decade! He criticizes some of the methodology used by the NCIPC and militates for a more rigorous scientific process for approval of grants in the area of injury prevention. He exposes specific flaws in several gun violence studies that attempted to link lawful gun ownership to violent crime. He argues that gun violence is not merely a consequence of "easy gun availability," but due to the cycle of government dependency, broken families, the failure of public education, and the cultural disintegration that has been taking place for decades, particularly in the poorer southern states, and for which the federal government welfare policies have been largely responsible. *America, Guns, and Freedom* outlines why the Second Amendment and armed self-defense are still

needed in modern society, debunks the arguments that the U.S. should follow the path of European social democracies by enforcing draconian gun control, and expounds on how civilian disarmament in Australia and Great Britain, despite media hype, has not decreased violent crime in those countries. In *America, Guns, and Freedom*, the author warns us of the five essential ingredients required for the creation and sustenance of tyrannical governments, one of which has been civilian disarmament via gun registration followed by gun bans and confiscation. Faria discusses mass shooting incidents and the role of mental illness. Special attention is given to the problem of how media sensationalism may encourage deranged individuals and madmen to become mass shooters seeking celebrity status, even in death. While gun control advocates decry America's "gun culture," Faria informs us of the significant role that this "gun culture" played in saving England during World War II. American traditions have been and remain beacons of liberty, and this is most evident in *America, Guns, and Freedom*. Totalitarian governments that deny their citizens the right to keep and bear arms are a threat to life, liberty, property, and the pursuit of happiness." A Treatise on 2nd Amendment Rights in the 21st Century is the result of research and analysis intended to answer one primary question: Has there been a shift away from the Constitution in regards to the powers of the government and rights of the people, creating an increasing threat of government tyranny and oppression, while subsequently restricting and prohibiting the right of the people to keep and bear arms through perceptual manipulation and circumvention? The Second Amendment, and the subsequent gun control debate, has now succumbed to the most polarized extremist ideologies since slavery. At its current pace, it will continue to follow the same path. These ideologies are fueled by the conflicting fears of government tyranny and domestic terrorism, along with a renewed sense of religious conflict. Many people follow one or the other of these extremist ideologies on pure emotion, without ever questioning facts or sound logic. A Treatise on 2nd Amendment Rights in the 21st Century goes beyond the

prevalent extremist bias and is a logic based pursuit of the facts in a fair, balanced and yet often comical read that anyone can relate to. The scope of the Second Amendment right is evaluated from three intertwined perspectives; the evolution of the right itself, the actual need to have the right as evaluated through changes in scope of the militia and the military, and the people's perceptions of the right as a result of both legislation and the media. Part 1 is broken down by a chronological history of the evolution of the right and the subsequent legislation and events which have dramatically affected the right. Part 2 covers the concept of insurrection, religion and the media in relation to the Second Amendment right along with an evaluation of specific points of issue and major players in the current gun control debate. The conclusion offers a logic based framework for gun legislation policies going forward. A Treatise on 2nd Amendment Rights in the 21st Century is a pilgrimage down a path towards the heart of the Second Amendment right and it is a journey "we the people" are long overdue to take. Should you wish to embark on such a journey, the map is now in your hands. In addition to U.S. policy, international agreements and gun control policies in other countries will also be analyzed to determine if those policies would be feasible in the U.S., or if the country's gun culture and legal precedents would simply strike down any attempt to establish more thorough regulations.

NOIR is a two-part White Paper, written by David L. Charney, M.D., a psychiatrist who had the unique experience of interviewing former FBI counterintelligence officer Robert Hanssen in jail, weekly, for approximately two hours per visit, for a year. Dr. Charney did the same with two other incarcerated insider spies: Earl Pitts (former FBI Special Agent revealed as a KGB spy), and Brian Regan (former Air Force/NRO). Dr. Charney's interest was to better understand the minds of spies for the sake of strengthening our national security. Over the eighteen years of his work with these cases, Dr. Charney developed a greater understanding of insider spy psychology and formulated new approaches and fresh proposals for better managing the problem of insider spies. Dr. Charney's first paper, "True Psychology of the Insider Spy," Part One of his two-part White Paper on insider spies, was published in late 2010 in the AFIO Intelligencer. This paper can be viewed on the NCIX (National Counterintelligence Executive)

website. Most Insider Threat management initiatives have been technology driven. While clever and useful up to a point, they are subject to the Law of Diminishing Returns and can backfire by creating a negative, distrustful workplace atmosphere. A well-motivated insider can defeat nearly any technology-based system. They will always find a way. By contrast, Dr. Charney's NOIR proposals center on the minds of potential or current insider threats: their psychologies and their inner worlds. The battle must be won there. NOIR focuses on "classic" state-sponsored espionage. However, many of its points are applicable for dealing with Snowden-type threats. NOIR for USA is a 501(c)3 entity to educate the US Intelligence Community, other government components, including the Congress, the courts, responsible journalists, and the general public, about the NOIR concepts and proposals. Dr. Charney and his colleagues at NOIR for USA would appreciate any comments, criticisms, or additional thoughts you may have about NOIR concepts and proposals: Contact@NOIR4USA.org

For years proposals for gun control and the ownership of firearms have been among the most contentious issues in American politics. For public authorities to make reasonable decisions on these matters, they must take into account facts about the relationship between guns and violence as well as conflicting constitutional claims and divided public opinion. In performing these tasks, legislators need adequate data and research to judge both the effects of firearms on violence and the effects of different violence control policies. Readers of the research literature on firearms may sometimes find themselves unable to

distinguish scholarship from advocacy. Given the importance of this issue, there is a pressing need for a clear and unbiased assessment of the existing portfolio of data and research. Firearms and Violence uses conventional standards of science to examine three major themes - firearms and violence, the quality of research, and the quality of data available. The book assesses the strengths and limitations of current databases, examining current research studies on firearm use and the efforts to reduce unjustified firearm use and suggests ways in which they can be improved.

New York is a city of writers. And when the city was attacked on 9/11, its writers began to do what writers do, they began to look and feel and think and write, began to struggle to process an event unimaginable before, and even after, it happened. The work of journalists appeared immediately, in news reports, commentaries, and personal essays. But no single collection has yet recorded how New York writers of fiction, poetry, and dramatic prose have responded to 9/11. Now, in *110 Stories*, Ulrich Baer has gathered a multi-hued range of voices that convey, with vivid immediacy and heightened imagination, the shock and loss suffered in September. From a stunning lineup of 110 renowned and emerging writers-including Paul Auster, Lynne Sharon Schwartz, Edwidge Danticat, Vivian Gornick, Phillip Lopate, Dennis Nurkse, Melvin Bukiet, Susan

Wheeler-these stories give readers not so much an analysis of what happened as the very shape and texture of a city in crisis, what it felt like to be here, the external and internal damage that the city and its inhabitants absorbed in the space and the aftermath of a few unforgettable hours. As A.M. Homes says in one of the book's eyewitness accounts, "There is no place to put this experience, no folder in the mental hard drive that says, 'catastrophe.' It is not something that you want to remember, not something that you want to forget." This collection testifies to the power of poetry and storytelling to preserve and give meaning to what seems overwhelming. It showcases the literary imagination in its capacity to gauge the impact of 9/11 on how we view the world. Just as the stories of the World Trade towers were filled with people from all walks of life, the stories collected here reflect New York's true diversity, its boundless complexity and polyglot energy, its regenerative imagination, and its spirit of solidarity and endurance. The Argead Dominion is the last holdout against the Imperial Padishah's brutal westward expansion. An aging arsenal of decaying tanks and antique rifles lets Argead forces scrape by, but true victories are won by the Polaris: elite battle-mages enslaved for the world-ending sins of their ancestors. Taki is an ambitious Polaris stuck with the dregs of his kind in a squad named Tirefire the Lesser. Though career suicide might be bearable in the right company, his new companions are anything but. The sniper despises him, the man-at-arms is profoundly depressed, and his beautiful captain has a penchant for beating her underlings. As the invading horde draws closer, this squad of defectives must band together despite the long odds against them. But with Imperial assassins out for their blood and treachery from within their own ranks, survival will come with a high price.

""The Yellow Wallpaper"" is a short story by American writer Charlotte Perkins Gilman, first published in January 1892 in The New England Magazine.[1] It is regarded as an important early work of American feminist literature, due to its illustration of the attitudes towards mental and physical health of women in the 19th century. Narrated in the first person, the story is a collection of journal entries written by a woman whose physician husband (John) has rented an old mansion for the summer. Forgoing other rooms in the house, the couple moves into the upstairs nursery. As a form of treatment, the unnamed woman is forbidden from working, and is encouraged to eat well and get plenty of air, so she can recuperate from what he calls a ""temporary nervous depression - a slight hysterical tendency"", a diagnosis common to women during that period"
