"To read their stories felt to me the way I suspect other people feel hearing jazz for the first time," recalls Curtis Sittenfeld of her initial encounter with the *Best American Short Stories* series. "They were windows into emotions I had and hadn't had, into other settings and circumstances and observations and relationships." Decades later, Sittenfeld was met by the same feeling selecting the stories for this year's edition. The result is a striking and nuanced collection, bringing to life awkward college students, disgraced public figures, raunchy grandparents, and

An arresting story by the legendary Nobel Prize-winning author—the only short story she ever wrote—about race and the relationships that shape us, in a stand-alone hardcover, with an introduction by Zadie Smith. In this 1983 short story, as timely now as it was then, we meet Twyla and Roberta, who have known each other since they were eight years old and spent four months together as roommates in St. Bonaventure shelter. Inseparable as girls, like “salt and pepper,” they lose touch as they grow older, only later to find each other at a diner, a

grocery store, and again at a protest. Seemingly at opposite ends of every problem, the two women are, like it or not, still held by the deep bond their shared experience forged between them. Described by Zadie Smith as a “work of genius,” *Recitatif* keeps Twyla's and Roberta's races ambiguous throughout the story. We know that one is white and one is Black, but which is which? Morrison herself described *Recitatif*, a story which will keep readers thinking and discussing for years to come, as “an experiment in the removal of all racial codes from a narrative about two characters of different races for whom racial identity is crucial.” Carrying within its short span the complexity and richness of a novel, moving effortlessly through time, *Recitatif* is a masterful look into what keeps us together and what keeps us apart, and how perceptions are made tangible by reality. Testament to Morrison's incomparable humanity and wisdom, this story is a gift to readers in these changing times.

In the late 1930s, civil war grips Spain. When General Franco and his Fascists succeed in overthrowing the government, hundreds of thousands are forced to flee in a treacherous journey over the mountains to the French border. Among them is Roser, a pregnant young widow, who finds her life intertwined with that of Victor Dalmau, an army doctor and the brother of her deceased love. In order to survive, the two must unite in a marriage neither of them desires. Together with two thousand other refugees, Roser and Victor embark on the SS Winnipeg, a ship chartered by the poet Pablo Neruda, to Chile: “the long petal of sea and wine and snow.” As unlikely partners, the couple embraces exile as the rest of Europe erupts in world war. Starting over on a new continent, they face trial after trial, but they will also find joy as they patiently await the day when they might go home. Through it all, their hope of returning to Spain keeps them going. Destined to witness the battle between freedom and repression as it plays out across the world, Roser and Victor will find that home might have been closer than they thought all along. A masterful work of historical fiction about hope, exile, and belonging, *A Long Petal of the Sea* shows Isabel Allende at the height of her powers. Praise for *A Long Petal of the Sea* “Both an intimate look at the relationship between one man and one woman and an epic story of love, war, family, and the search for home, this gorgeous

She knows that all stories are love stories, and the greatest love stories are told by time.”—Colum McCann, National Book Award–winning author of *Let the Great World Spin*

gut. Written by a specialist gut dietitian, *The Low-FODMAP Recipe Book* can help you to take control of Irritable Bowel Syndrome (IBS), functional bowel disorder and digestive distress. Dietary management is key to managing IBS and other gut disorders. The most successful diet for bringing relief for symptoms such as bloating, abdominal distension, excessive wind, diarrhoea and other digestive issues is the low-FODMAP diet, which has been medically proven in rigorous clinical trials to improve symptoms in up to 75 per cent of people with IBS. Because of the diet's success it is quickly becoming an essential treatment for people with a sensitive gut and can help in the management of a wide range of stomach troubles and gastrointestinal discomfort. The low-FODMAP diet will help you to identify food intolerances, including intolerance of lactose and fructose, and may also be used to help those who are suffering from Inflammatory Bowel Disease (IBD), Coeliac Disease and functional symptoms following gastrointestinal surgery. An expert in the low-FODMAP diet and gut disorders, author Lucy Whigham will help you to understand more about the way your gut functions and what is contributing to your symptoms. This book is an easy guide to why and how the low-FODMAP diet can help, and includes tables of what foods need to be avoided for the elimination phase and beyond. FODMAPs (Fermentable Oligosaccharides, Di-saccharides,

Mono-saccharides and Polyols) are naturally occurring sugars that are found in a wide range of everyday foods. They are not fully broken down during digestion and therefore cannot be completely absorbed by the body. Instead they travel through the gut where they are fermented by the bacteria that live in our gastrointestinal tract. In susceptible people (those with a sensitive gut) this fermentation can lead to excessive wind, bloating, pain, cramping and stomach gurglings. FODMAPs also draw water into the gut, which can lead to diarrhoea and frequent bowel motions. Cutting out foods that are high in these fermentable carbohydrates and following a low-FODMAP diet can help you to regain control over your digestive symptoms and thereby improve your quality of life. Once your symptoms are under control you can start to re-introduce FODMAPs to help you identify your individual intolerances and threshold levels. In this way you are empowered with the knowledge of exactly which foods cause you problems, putting you in the driving seat and letting you control your symptoms rather than have them control you.
