"will give toddlers a happy Halloween" – The Sunday Times This eye-poppingly colourful, hilarious book is an instant winner with children and adults alike. Starring an adorably grumpy bat and animal friends, I Am Bat is perfect for fans of Superbat and Oi Frog! Bat's cherries keep going missing. One by one, they are whisked away by mischievous animal tricksters behind Bat's back. Super-talent Morag Hood cleverly draws the reader into this interactive story: as Bat attempts to track down the guilty cherry thief everyone's a suspect – including you! From the illustrator of Sophie Johnson: Unicorn Expert and creator of The Steves, Aalfred and Aalbert and Colin and Lee, Carrot and Pea.

Ideal as a companion to the text. Perfect as a stand-alone study guide. Body system by system, the exercises and activities you'll find inside will help you to master the basics of anatomy and physiology. Complete the corresponding sections of the Workbook as you proceed from topic to topic in class.

This collection of over 200 classroom-tested activities and reproducible worksheets for students in grades 7 through 12 covers vital concepts in human biology and health, including extensive coverage of AIDS. These high-interest lessons and worksheets get students actively involved in learning—even students who are poorly motivated, learning disabled, or who lack English proficiency. The lessons are written so you can easily accommodate your students' various learning styles whether it's visual, auditory, and tactile. Each lesson helps students make connections between new material and concepts they're already familiar with. The book features 11 units, covering all the body's systems—such as circulatory, digestive, and immune systems, and offers a detailed look at cells, bones, muscles, and more. Each unit provides enjoyable, hands-on activities that engage secondary students—from building a cell model and testing foods for carbohydrates to dissecting a frog and making an action cartoon of a macrophage battling a microorganism. For convenience, the lessons are printed in a big, spiral-bound format that folds flat for photocopying.

This is the chapter slice "The Senses of Taste and Smell" from the full lesson plan "Senses, Nervous & Respiratory Systems"* How long is a nerve cell? How are our lungs like a train station? We answer these questions and much more in our second resource on the human body. Curriculum-based material written in an easy-to-understand way makes this a hit for teachers and students alike. Loaded with information on the brain, spinal cord and nerves, students will learn the main parts of the nervous system and how each works. Also investigate the organs of the five senses, and then take a trip around the respiratory system! Find out exactly where air goes when we breathe it in, and then out. Reading passages, comprehension questions, hands-on activities and color mini posters are provided. Also included: Crossword, Word Search, Test Prep and Final Quiz. All of our content is aligned to your State Standards and are written to Bloom's Taxonomy and STEM initiatives.

This review guide completely prepares test takers for their licensing exam. The first section is comprised of test questions and answers. Recently revised to include even more test questions!

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand—and apply—key concepts.
