The need for a comprehensive volume that reviews both the processes and issues involved in developing, administering, and validating large-scale assessment programs has never been greater. These programs are used for many purposes, including instructional program evaluation, promotion, certification, graduation, and accountability. One of the greatest problems we face is how to deal with special needs and bilingual populations. Examining these processes and issues is the mission of this book. It is organized into the following five sections: Introduction, Validity Issues, Technical Issues, Implementation Issues, and Epilogue. Each chapter follows a common structure: Overview of critical issues, review of relevant research, descriptions of current assessment methodologies, and recommendations for the future research and practice. Written by nationally recognized scholars, *Large-Scale Assessment Programs for All Students: Validity, Technical Adequacy, and Implementation* will appeal to anyone seriously involved in large scale testing, including educators, policymakers, testing company personnel, and researchers in education, psychology, and public policy. This standard specifies two methods for determining the acidity or alkalinity of aqueous extract of paper, board and pulp: Titration method and pH meter method. The titration method of this standard applies to the determination of acidity or alkalinity of common aqueous extract of paper, board and pulp, not to the paper or board containing alkaline filler or coating. pH value method applies to the aqueous extract of paper, board and pulp, the conductivity of which exceeds 0.2mS/m.

*Navigating the Common Good in Teacher Education Policy* examines the changing relationships between the state and the common (or public) good. Using teacher education policy as the frame of analysis, the authors examine history, cultural context, and lived experiences in 12 countries and the European Union to explicate which notions of justice, social inclusion and exclusion, and citizenship emerge. By situating teacher education policy within a larger philosophical framework regarding the relationship between the state and conceptions of the "common good," this book analyzes the ideological and political desires of the state---how the state understands the common good, the future of national identity, and to what end schooling is imagined.

Published annually, *Brookings Papers on Education Policy (BPEP)* analyzes policies intended to improve student performance. In each volume, some of the best-informed analysts in various disciplines review the current situation in education and consider programs for reform. In this fourth annual issue of the series, prominent educators and other social scientists discuss standards in education. Contents include: "Incentives and Equity under Standards-Based Reform" Julian R. Betts and Robert M. Costrell "Why Business Backs Education Standards" Milton Goldberg and Susan Traiman "State Academic Standards" Chester Finn Jr. and Marci Kanstoroom "Searching for Indirect Evidence for the Effects of Statewide Reforms" David Grissmer and Ann Flanagan "The Controversy over the National Assessment Governing Board Standards" Mark Reckase "The Role of End-of-Course Exams and Minimum Competency Exams in Standards-Based Reforms" John H. Bishop, Ferran Mane, Michael Bishop, and Joan Moriarty "A Diagnostic Analysis of Black-White GPA Disparities in Shaker Heights, Ohio" Ronald F. Ferguson

In his 1997 State of the Union address, President Clinton announced a federal initiative to develop tests of 4th-grade reading and 8th-grade mathematics that could be administered on a voluntary basis by states and school districts beginning in spring 1999. The principal purpose of the Voluntary National Tests (VNT) is to provide parents and teachers with systematic and reliable information about the verbal and quantitative skills that students have achieved at two key points in their educational careers. The U.S. Department of Education anticipated that this information would serve as a catalyst for continued school improvement, by focusing parental and community attention on achievement and by providing an additional tool to hold school systems accountable for their students' performance in relation to nationwide standards. Shortly after initial development work on the VNT, Congress transferred responsibility for VNT policies, direction, and guidelines from the department to the National Assessment Governing Board (NAGB, the governing body for the National Assessment of Educational Progress). Test development activities were to continue, but Congress prohibited pilot and field testing and operational use of the VNT pending further consideration. At the same time, Congress called on the National Research Council (NRC) to assess the VNT development activities. Since the evaluation began, the NRC has issued three reports on VNT development: an interim and final report on the first year's work and an interim report earlier on this second year's work. This final report includes the findings and recommendations from the interim report, modified by new information and analysis, and presents our overall conclusions and recommendations regarding the VNT.

*The Rise and Fall of National Test Scores* examines, in some depth, the nature of test score changes over an extended period of time and in a broad range of subject matters and levels of schooling. The book contains chapters contributed by experts on various aspects of educational tests and score interpretation and uses. The text discusses the interpretations of trends in college admissions test scores and questions about the post-admission performance of ethnic minority students. The book examines general school achievement trends of high school students and the trends observed in broad-based testing programs of the

National Assessment of Educational Progress (NAEP). The complexities involved in obtaining dependable data with which to make informed judgments about reading achievement trends are examined. The text further tackles the positive and negative trends in academic achievement in Science with particular emphasis on the effects of curriculum revision; as well as the problems of mathematics testing. The book then describes test score trends and problems in Great Britain and Ireland, with attention given to the similarities and differences of those countries and the United States. Educators, researchers, political leaders, and informed, interested laymen will find the book invaluable.
