It fully integrates the choral field experience for hands-on learning and reflection and allows the student to observe and teach the book's principles. It covers the essentials of vocal development, auditions, literature, rehearsals, classroom management, and practical matters.

In some ways, the successor of vaudeville and an extension of the opera and operetta, the stage musical has evolved into a worldwide juggernaut. Musicals are staged not only across the globe but are offered in a variety of settings, from the high school stage and major theater to the big screen. The stage musical has become a staple for the professional singer and the object of close study by students of singing. In *So You Want to Sing Music Theater: A Guide for Professionals*, singer and scholar Karen S. Hall fills an important gap in the instructional literature for those who sing or teach singing to those seeking their fortunes in music theatrical productions. Developed in coordination with the National Association for Teachers of Singing, this work draws on current research from the world of voice scholarship to advance the careers of singers seeking to make a foray into or already deeply embedded in the world of music theater. *So You Want to Sing Music Theater* covers a vast array of topics. It includes a brief history of music theater; the basics of vocal science and anatomy; information on vocal and bodily health and maintenance, from diet to exercise to healing techniques; advice on teaching music theater to others, with focuses on breath, posture, registers, range, and tone quality; repertoire recommendations for voice and singing types, from female and male belting to classical and contemporary styles; a survey of music theater styles, such as folk, country, rock, gospel, rhythm and blues, jazz, and pop; insights on working with other music theater stakeholder, from singing teacher, vocal coach and accompanist, to acting teacher, director, dance instructor, composer, and music director; and finally sage advice on working with and without amplification or microphones, auditioning tips, and casting challenges. *So You Want to Sing Music Theater* includes guest-authored chapters by singing professionals Scott McCoy and Wendy LeBorgne. This work is not only the ideal guide to singing professionals, but the perfect reference works for voice teachers and their students, music directors, acting teachers, dance instructors and choreographers, and composers, and conductors. The *So You Want to Sing* series is produced in partnership with the National Association of Teachers of Singing. Like all books in the series, *So You Want to Sing Music Theater* features online supplemental material on the NATS website. Please visit www.nats.org to access style-specific exercises, audio and video files, and additional resources. This is an annotated bibliography to books, recordings, videos, and websites on choral music. This book will serve as an excellent tool for librarians, researchers, and scholars in sorting through the massive amount of new material that has appeared since publication of the previous edition.

A sequential sight-singing curriculum for all choirs. Each of the six units (containing four lessons each) clearly introduces new music reading concepts,

reinforces those concepts with several rhythm and pitch exercises, motivates students with helpful hints and challenge exercises, and concludes with fun-filled review games and "Evaluating Your Performance" questions. The helpful "Getting Ready" pages (which precede each unit) are filled with music fundamentals, and for choirs who have never read music before, an optional "Before We Begin" chapter opens the book. And it's all a neatly laid out publication and a perfect fit for your students. From whole notes to sixteenth-note patterns, seconds to sevenths, key signatures, dynamics, articulations, and tempo markings; it's all here, and it's all logically ordered to insure student success! Spend just a few minutes a day with this book and your choir, too, will learn to "Sing at First Sight!"

David Gibson uses 3D visual representations of sounds in a mix as a tool to explain the dynamics that can be created in a mix. This book provides an in-depth exploration into the aesthetics of what makes a great mix. Gibson's unique approach explains how to map sounds to visuals in order to create a visual framework that can be used to analyze what is going on in any mix. Once you have the framework down, Gibson then uses it to explain the traditions that have been developed over time by great recording engineers for different styles of music and songs. You will come to understand everything that can be done in a mix to create dynamics that affect people in really deep ways. Once you understand what engineers are doing to create the great mixes they do, you can then use this framework to develop your own values as to what you feel is a good mix. Once you have a perspective on what all can be done, you have the power to be truly creative on your own – to create whole new mixing possibilities. It is all about creating art out of technology. This book goes beyond explaining what the equipment does – it explains what to do with the equipment to make the best possible mixes.

Problematizing the "reason" of schooling as historical and political, in this book leading international and interdisciplinary scholars challenge the common sense of schooling and the relation of society, education, and curriculum studies. Examining the limits of contemporary notions of power and schooling, the argument is that the principles that order school subjects, the curriculum, and teaching reforms are historical practices that govern what is thought, acted on, and talked about. Highlighting the dynamics of social exclusion, the normalizing of people through curriculum, and questions of social inclusion, *The "Reason" of Schooling* underscores the urgency for rethinking curriculum research.

This book demonstrates why and how it is necessary to redesign Islamic Education curriculum in the K-12 sector globally. From Western public schools that integrate Muslim perspectives to be culturally responsive, to public and private schools in Muslim minority and majority contexts that teach Islamic studies as a core subject or teach from an Islamic perspective, the volume highlights the unique global and sociocultural contexts that support the disparate trajectories of Islamic Education curricula. Divided into three distinct parts, the text discusses current Islamic education curricula and considers new areas for inclusion as part of a general renewal effort that includes developing curricula from an Islamic worldview, and the current aspirations of Islamic education globally. By providing insights on key concepts related to teaching Islam, case studies of curriculum achievements and pitfalls, and suggested processes and pillars for curriculum development, contributors present possibilities for researchers and educators to think about teaching Islam differently. This text will benefit researchers, doctoral students, and academics in the fields of secondary education, Islamic education, and curriculum studies. Those interested in religious education as well as the sociology and theory of religion more broadly will also enjoy this volume.
